

Sprint 2: Schedule

Axel Visan, Brooklyn Guo, Burhan Mirza, Danyal Ilyas, Ramzi Abu-zeinah, Saiem Irfan, Stanislav Kalynych

How we plan to stick to a schedule:

- Make sure everyone attends standup to evaluate the progress of others and confirm everyone is focused and can ask for help if necessary to stay on track
- Use Jira effectively to ensure everyone knows what they are working on and conflicts don't emerge
- For sprint 2 our focus was UI-oriented to improve upon the backend architecture we implemented in sprint 1 to provide a better user experience and feel for our product.

In conclusion, everyone did their part well due to the unforeseen extenuating circumstances surrounding a hectic school schedule we had to push WAV-13 to the next sprint we plan to start early and finish on time!
