

Sprint 4 Schedule

Axel Visan, Brooklyn Guo, Burhan Mirza, Danyal Ilyas, Ramzi Abu-zeinah, Saiem irfan, Stanislav Kalynych

How we plan to stick to the schedule

-Make sure that standups are more effective by ensuring everyone is open and honest about their timelines as there is lots of work to implement this sprint and connect all of our sub pieces together

-Use Jira to effectively see where current tasks are in progress and if more resources need to be put into it which is important for the final sprint to ensure our most needed stories are ready to present next week in final presentation

-For our sprint 4 we had to be able to wrap up our project which means we looked back at our original goals from the beginning of the semester to motivate us to achieve all of them

In conclusion, it was our final sprint! We used that fact as motivation to push out the final product that we are all proud of
