

# Sprint 3 Schedule

Axel Visan, Brooklyn Guo, Burhan Mirza, Danyal Ilyas, Ramzi Abu-zeinah, Saiem irfan, Stanislav Kalynych

## How we plan to stick to the schedule

- Make sure that participation in standups is more encouraged to allow people the ability to address their blockers and try and find help from other members.
- Use Jira to effectively see where current tasks are in progress and if more resources need to be put into it especially this sprint as we pushed a user story forward into this sprint so Jira is critical to ensuring we stay on track
- For our sprint 3 we have some code that had to be modified such as backend models so fixing the models while ensuring everyone was aware of the changes that may impact them so that disruption is kept to a minimum!

In conclusion, it was a tough sprint but we were able to push through and we have some great features to demo!
